SKILLS

- Programming:** Python, JavaScript, TypeScript, SQL, Bash, C/C++
- Backend:** FastAPI, REST APIs, SQLAlchemy, Pydantic, JWT, Alembic
- Databases:** PostgreSQL, SQL
- Testing:** Pytest, Automated Testing
- Frontend:** React, HTML, CSS
- Tools & DevOps:** Git, GitHub, Docker, GitHub Actions

LANGUAGES

- Portuguese — Native
- English — B2 / Upper-Intermediate
- Japanese — Intermediate / currently studying

PROFILE

Computer Science graduate with hands-on experience developing web applications using Python, FastAPI, PostgreSQL, React and Docker. Skilled in building REST APIs, databases and full-stack applications. Seeking a junior software engineering or backend development opportunity.

PROJECT EXPERIENCE

Writing Planner

Full-Stack Writing Management Application

- Writing and project management application designed for organizing stories, chapters, characters, notes and tasks.
- Developed backend architecture with FastAPI, PostgreSQL, SQLAlchemy and Alembic.
- Implemented JWT authentication and REST API endpoints.
- Designed relational data models for managing complex writing projects.

Daily Quest

Full-Stack Productivity & Gamification Application

- Gamified daily planning application combining task management with RPG-style progression.
- Developed systems for tasks, quests, XP, levels, stats, HP, Mana and mood tracking.
- Built REST API endpoints and PostgreSQL database models with FastAPI and SQLAlchemy.
- Implemented automated tests for core gamification features.

Finance Manager

Personal Finance Management Application

- Personal finance application for tracking income, expenses, categories and balances.
- Built with FastAPI, PostgreSQL, SQLAlchemy, React and JavaScript.
- Implemented JWT authentication, CRUD operations, migrations and automated tests.
